

SAFETY DATA SHEET AUTHORING PROCESS

SDS AUTHORIZING SERVICES

It is essential to have accurate and complete information on your Safety Data Sheet to ensure GHS compliance. Pace® provides SDS authoring services to comply with local, national, and international regulations.

PROJECTS OF ALL SIZES & REQUIREMENTS

- Large volume SDS projects
- Single SDS Projects
- Domestic and International SDS and label authoring
- Product label reviews
- Foreign language translations

FLEXIBLE AUTHORIZING CAPABILITIES

Our team of SDS authors are able to complete projects either in our GHS software or yours.

SDSs are written to meet OSHA compliance, WHMIS and many other international regulations. This process includes OSHA labels and MSDS updates to ensure your SDSs are current and accurate.

Through regulatory staffing, we provide trained regulatory professionals to author SDSs in your software, either on location or remotely. This option offers flexibility for large volume SDS projects including acquisitions, new product lines and integrations.

WATCH OUR WEBINAR

What the Proposed Rule Changes to OSHA
Hazard Communication Standard May Mean
to Your Operations

STEP 1

PROVIDE COMPLETE PRODUCT FORMULATION

Fill out spreadsheet with product information

When the information is received, our project coordinator provides a timeline

Your project then moves to the authoring phase

STEP 2

AUTHORIZING BY PACE®

You are paired with a project manager

SDS(s) is then authored by our team of experts

STEP 3

PROJECT COMPLETION

Receive your SDS(s) directly via email or our secure portal
